DETAILED ACTION

Amendments to the Claims

Applicant's amendment filed 04/24/06 has been entered. Claim 1 is amended. Claims 1-4, 6-7 and 10-17 are being examined on the merits. Claims 5, 8-9 and 18-36 have been withdrawn from consideration as directed to a nonelected invention.

Claim Rejections - 35 USC § 102 & 103

The rejection of claims 1-4, 6-7 and 10-17 under 35 U.S.C. 102(a & e) as anticipated by or, in the alternative, under 103(a) as obvious over Rein et al. (US Patent No: 6,316,190) is withdrawn pursuant to applicant's amendments; however, upon cancellation of the new matter amended to claim 1, the present grounds of rejection will be reinstated.

New Rejections

Specification

The amendment filed April 24, 2006 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. Statute 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material, which is not supported by the original disclosure is as follows: "the oligonucleotide binds to one or more viral proteins, wherein said viral protein is different

from a retroviral nucleocapsid protein, meaning that the viral component is not a retroviral nucleocapsid protein”.

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-4, 6-7 and 10-17 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. This is a new matter rejection.

The amendment of claim 1 introduces new matter as the claims recites the limitation “...wherein the viral component is different from a retroviral nucleocapsid protein”. There is no support in the original specification as filed for this limitation. Applicant is required to cancel the new matter in response to this Office action or point out where in the original disclosure support for the newly added limitation can be found.
